Application Hosting Accelerator

Well Architected Ready

Keeping your Application hosting infrastructure up and running should not come at the cost of security or efficiency. Utilizing Application Hosting accelerator by ibexlabs gives you the tools to jumpstart innovations and accelerate your cloud journey.

“ I was looking for a strategic partner to help me create and implement a very robust, HIPAA compliant, and secure AWS infrastructure. I've been very impressed with the entire Ibexlabs team and highly recommend others to work with them.

- Tim Heger

HEALTHBRIDGE FINANCIAL CTO/CISO

Traditional Data Infrastructure

- Constant need for security and update monitoring
- Day-to-day resource management
- Cost of in-house IT support
- Difficulty adhering to regulations

The Ibexlabs Solution

- AWS Well-Architected Framework scales with you
- Quickly deploy application hosting environments
- Accelerate application hosting and modernization
- Free up resources by eliminating manual provisioning
- Faster time to market, lower operational costs and faster speeds

Benefits

Operational Excellence

- Automated load balancing and dynamic scaling drastically increase fault tolerance, all while curbing downtime.
- If your business is looking to expand, you need infrastructure that can handle it.

24/7 Security

- Firewalls, encryption and other security tools that ensure that your system will be ready for any cyberthreat.
- With 24/7 automatic security management, your guard is never down.

Regulatory Compliance

- Whether HIPAA, PCI, HiTrust, or any other regulatory requirements, we can institute a framework suited to the sensitivity of your data.

Multi-Platform

- Ibexlabs works with your code to increase efficiency, security and scalability.
- AWS Elastic Beanstalk supports hosting for many popular frameworks written in languages such as Java, NodeJS, Python and Docker based deployments.

Build With You

- Have a system that grows alongside the data needs of your business.
- Security, load balancing and update management scale with your data, including over several availability zones.

When can we get started?

Full implementation of your application hosting platform takes about four to six weeks. During that time, Ibexlabs will help host or migrate your application with minimal user impact.

Ibexlabs has helped many customers over the years with cloud hosting and modernization and achieved multiple AWS competencies such as DevOps, Healthcare, MSP and is part of AWS Well Architected Partner program. We believe in customer obsession, transparency and [our reviews](#) speak to the results we helped deliver to our customers over the years.
